Date: Oct 2011

Santa Ana, Ca: Stancil Logging Recorder won the coveted 2011 Hot Products Award from Public Safety Communication (PSC).

During the 77th annual APCO Conference & Exposition (Philadelphia, Pennsylvania) 80 products from the 350 vendors were submitted for 2011 Hot Product. The PSC staff and Editorial Advisory Committee selected the Stancil Logging Recorder as one of the 25 most exciting products for the Public Safety Environment.

The Stancil Logging Recorder provides recording for VOIP and ROIP networks as well as all the traditional circuitry (analog, digital handsets T1 and E1). It has advanced indexing technology suited for migration to the NG91-1-1 environment. Recordings can be housed on numerous storage technologies (RAID, NAS, SAN or external recording media) to provide you with maximum reliability and confidentiality.

“As a quality assurance specialist” says a reviewer, “I really like this audio recorder because of all the information it records and can provide on the back end in call review. It offers audio recording with screen capture, saved to multiple formats that can be e-mailed.”

The Stancil Logging Recorder not only has geo-location capabilities but also shows the service type of call (RESO, BUSN, PBX, VOIP etc). Working closely with the other manufacturers at ICE events, Stancil Corporation have been able to ensure the Stancil Logger meets the current NG9-1-1 standards. This process is continually evolving and Stancil Corporation is committed to ensure the Stancil Logging Recorder meets future regulations.

About Stancil Corporation: Stancil Corporation was founded in 1946 and still is a leading manufacturer of Logging and Recording products. It has made significant investment in NG-9-1-1 to ensure its customers have a successful migration to this new technology.
